

|   |                                                                                                                                                                            |
|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4 | Uses the concept of relative error to establish an upper bound for the error through a clear argument with minimal gaps. Provides an example that reflects the argument.   |
| 3 | Uses the concept of relative error to establish an upper bound for the error but provides an argument with one or more gaps, or the example does not reflect the argument. |
| 2 | Shows some understanding of relative error but is unable to establish an upper bound for the error.                                                                        |
| 1 | Shows limited understanding of relative error.                                                                                                                             |
